Template for summary of course evaluations

Course name, course code
Advanced GIS Analysis, 2KG603

Start and finish date
2017-10-31 – 2018-01-14

Date of summary
2018-03-06

Number of registered students/participants in evaluation
9/4

Forms of evaluation
Cambro

1. ***General comments about the course and its implementation***

This was the first time the course was given. The structure of the course: Firstly, the students worked on their own, with some supervision, with learning basics in the tool ModelBuilder in ArcGIS. This was rated as effective (4,5 on a scale of 5). Following this there were three examining exercises and one take-home examination. This course structure was rated as Good by all the students (3,75 on a scale of 5). Overall, the quality of the course is rated as high by the students (4.5 on a scale of 5).

2. ***What has worked (particularly) well during the course?***

All students agree that they have reached the expected learning outcomes of the course (4 on a scale of 5) and that the course gave them tools for critical thinking (4.25 on a scale of 5). They all asses that they have been treated well during the course (4 on a scale of 4).

3. ***What has worked less well or failed?***

The ArcGIS program crashed for some students during exercises A. This should be solved now through some upgrading of the computers.

4. ***What needs to be done before the course is given next time?***

Consider were we can introduce ArcGIS Pro earlier in the course.
There is no need to change the course literature for next time. We will however make literature available on Cambro, that in more detail explain some of the concepts used during the course, as a complement to the course literature.
