

Installation of VPN client Windows

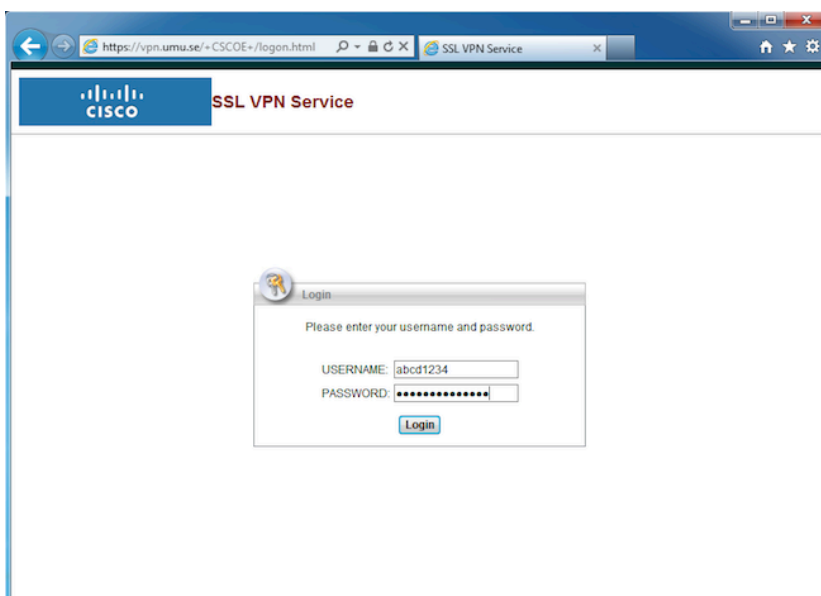

Updated: 2020-09-09 / in [English](#), [VPN](#) /

To install the client on a computer with Windows do the following:

Open a web browser and surf to

<https://vpn.umu.se> [<https://vpn.umu.se>]

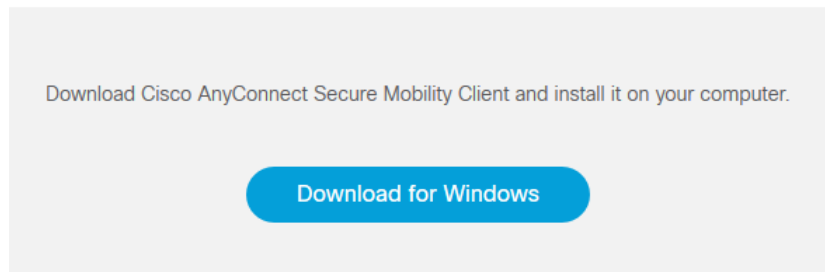

1. Log in with your login for your VPN-account (Umu-id or VPN-user).

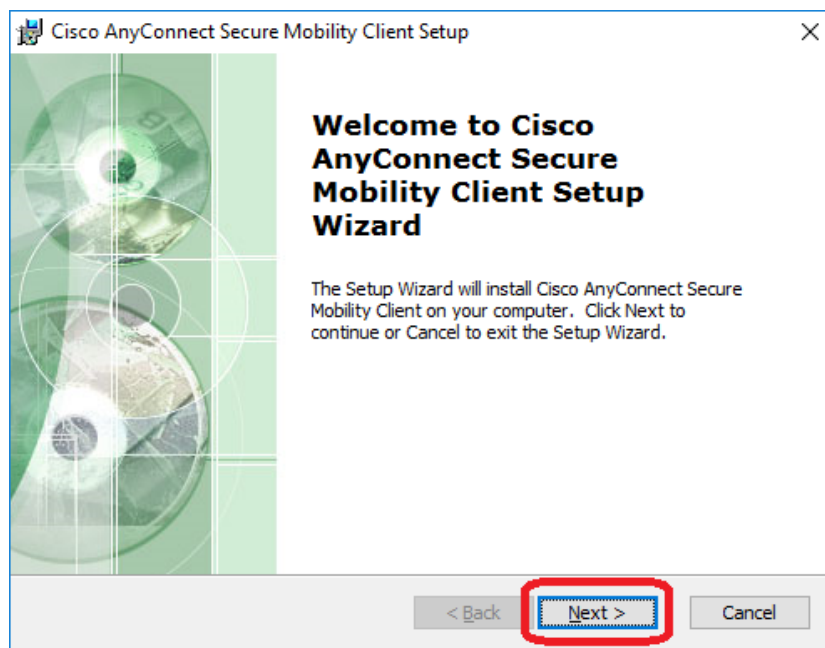

2. The page verifies the operating system. It can take a few minutes.

3. Click on the link **“Download for Windows”** to download the client to your computer.

Download & Install

4. **Open the file** you downloaded and click **Next** to start the installation.

5. Finished!

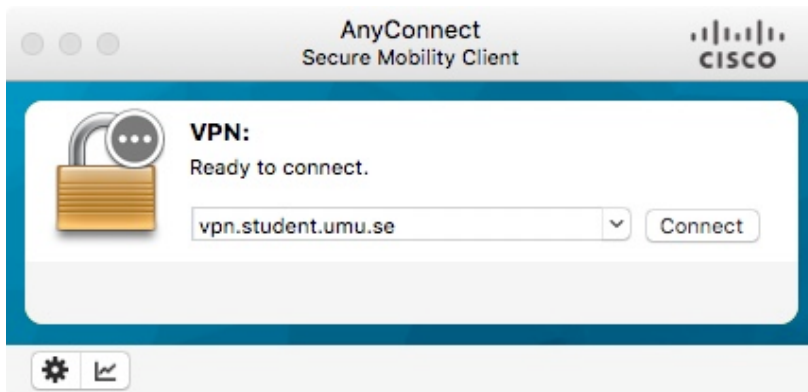

Set up the client with the correct information

When the installation is finished you need to input the correct information.

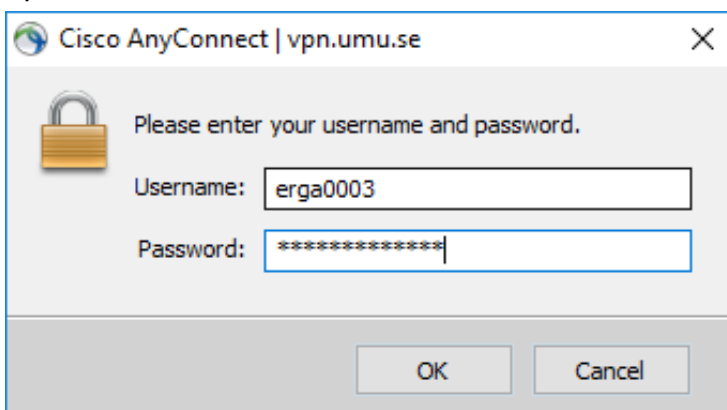

1. **Open the start menu** on your computer and find the program *Cisco AnyConnect Secure Mobility*

Client

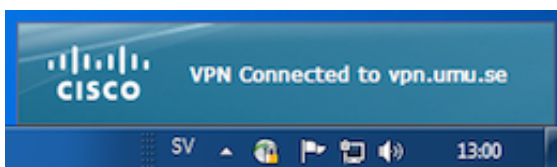

2. **Start** the program
3. Write in **vpn.student.umu.se** in the window that opens and then choose **Connect**

4. If you receive a question regarding your login credentials, fill in your **VPN-account** (Umu-id or vpn-user) and click OK

5. Finished! When you are connected via VPN the picture will look like this:
