Ordering Form Blastocyst Injection

Note! By submitting this form the customer certifies that all figures below are correct and that the customer have read and understood the conditions listed below.

Customer name:	
Name of ES cell clone and number of clones:	
Affiliation:	
Department:	
Telephone:	
Email:	
Email:	
Adress for shipment:	
Postal code and city:	
Adress for invoice (if other):	
Approval from ethical committe (must be attached to this form):	Date/number
Genetic background ES-cells:	
Genetic background Blastocyst donators:	<input type="checkbox"/> C57BL/6 <input type="checkbox"/> Balb-c <input type="checkbox"/> CBA <input type="checkbox"/> Other:
Age at which the offspring will be analyzed:	<input type="checkbox"/> Adult <input type="checkbox"/> Embryonic <input type="checkbox"/> Other:

Short description of the project and expected phenotype, or other information of possible interest to UTCF:

UTCF will attempt to introduce ES cells into early mouse embryos (blastocysts) with the aim of generating chimeric mice used for germ line transmission of specific gene alterations. This work will be charged according to taxes in force on signature date and under the terms stated at UCCB's webpage.

Information is also available at UCCB's collaboration site/information site under Aurora

*Unless otherwise decided beforehand, the customer is responsible for further analysis of the chimeric mice, i.e. subsequent crosses to achieve germ line transmission, or other analyses related to the project. **The customer is obliged to report back the number of positive chimeras to UTCF for statistical purposes.** UTCF should be acknowledged in the first published paper that describes the resulting knock-out mice. A reprint of this publication shall also be sent to the facility.*

Signature and date Customer:

Signature and date UTCF official:

Please review the above information carefully before submitting form by mail or in person to:

Koordinator for UTCF, Email: utcf.uccb@umu.se
