**Driven to Discover<sup>SM</sup>**

# GROUNDING ASSUMPTIONS

**(1) This is an age  
of transformation**

Every few hundred years throughout history a sharp transformation has occurred. In a matter of decades, society altogether rearranges itself.

Fifty years later a new world exists. And the people born into it cannot imagine the world in which their grandparents lived and into which their own parents were born.

Drucker, P. (1995). *Managing in a time of great change*. New York: Talley House, Dutton.

**(2) Change Occurs  
From the Outside-In  
More Often than the  
Inside-Out**

**“In all instances in modern society change is exceptional. When it comes about, it does so primarily as a response to outside forces. In no case does it come readily.”**

O'Toole, J. (1995). *Leading change*. San Francisco: Jossey Bass.

# **(3) Tradition is a Conserving Force**

“A world in which change is the rule would be characterized by chaos, leading to social collapse.

Therefore, a society must have one foot permanently on the brake; it must have a pre-disposition to tradition and conservatism.”

O'Toole, J. (1995). *Leading change*. San Francisco: Jossey Bass.

# Cultural Expectations Play Out in Schools

**TRANSFORMATIONAL  
FORCES**

**CONSERVATIONAL  
FORCES**

***Can School Culture  
and School  
Leaders Be  
POWERFUL Tools  
for Effective  
Change?***

# Cultural Challenge: Introductions

- Introduce yourself to someone sitting near you who you do not know well (turn around?)
- Share how students, teachers (or parents) in your school are responding to transformational forces and conserving forces
- Share a cultural challenge that you are currently facing in your school....
- Keep those in mind so we can talk about them later...

# Sweden and Minnesota

# Culture and Leadership

## Sweden

- *“Individualism” – moderate*
- *“Masculinity” – low*
- “Long-term Orientation” -- moderate
- “Power Distance” – moderate
- “Uncertainty Avoidance” – low

## U.S.

- *“Individualism” – high*
- “Masculinity” – high
- “Long-term Orientation” -- moderate
- “Power Distance” – moderate
- “Uncertainty Avoidance” - low

(Geert Hofstede, *Culture's Consequences*, 2001)

# Policy Context

as a percentage of GDP, all levels of education (excluding subsidies, 2008=100)

Change between 2008 and 2011 in public expenditure on education as a percentage of total public expenditure (including subsidies to households, 2008=100)

Change between 2008 and 2011 in public expenditure on educational institutions all levels of education (excluding subsidies, 2008=100)

Change between 2008 and 2011 in public expenditure for all services including education (2008=100)

Change between 2008 and 2011 in GDP all levels of education (2008=100)

Change between 2008 and 2011 in public expenditure on education (including subsidies to households, 2008=100)

Green = US  
 Red = SE  
 Yellow = DE  
 Blue = FI

# US AND SE: Common Themes

**Weak scores on international tests**

**Declining equity in performance**

(Ulf Lundgren)

**Weak teaching; fewer people applying to become teachers**

(Caroline Liberg)

**‘It is not a particular reform, initiative or reason behind the development. The policy has created a slippery slope for the Swedish school system that depends on many factors. It is naive to believe otherwise.’ (Ulf Lundgren)**

# Important Cultural Strengths:

- Swedes are life-long learners
- Education remained a social priority, even under the former center-right government
- Efforts to create equitable opportunities have not abated
- Education and employment are closely linked

# Under These Conditions....

- How do leaders influence student learning?
- What patterns of leadership, from teachers, principals, and district staff, influence the *quality of instruction and student learning*?

# More Challenges: Introductions

- Think of an enduring (hard to change) characteristic of your school that keeps it from being the best it could be...
- How have you tried to address it? How well has that worked?
- Share that challenge with someone sitting near you....
- Keep it in mind ...

**NOW FOR THE PROMISED  
RESEARCH....**

# We Began with What is Known

- 1. Leadership effects on students are indirect.**
- 2. Leadership matters most when and where it is most needed.**

Now, on to our findings...

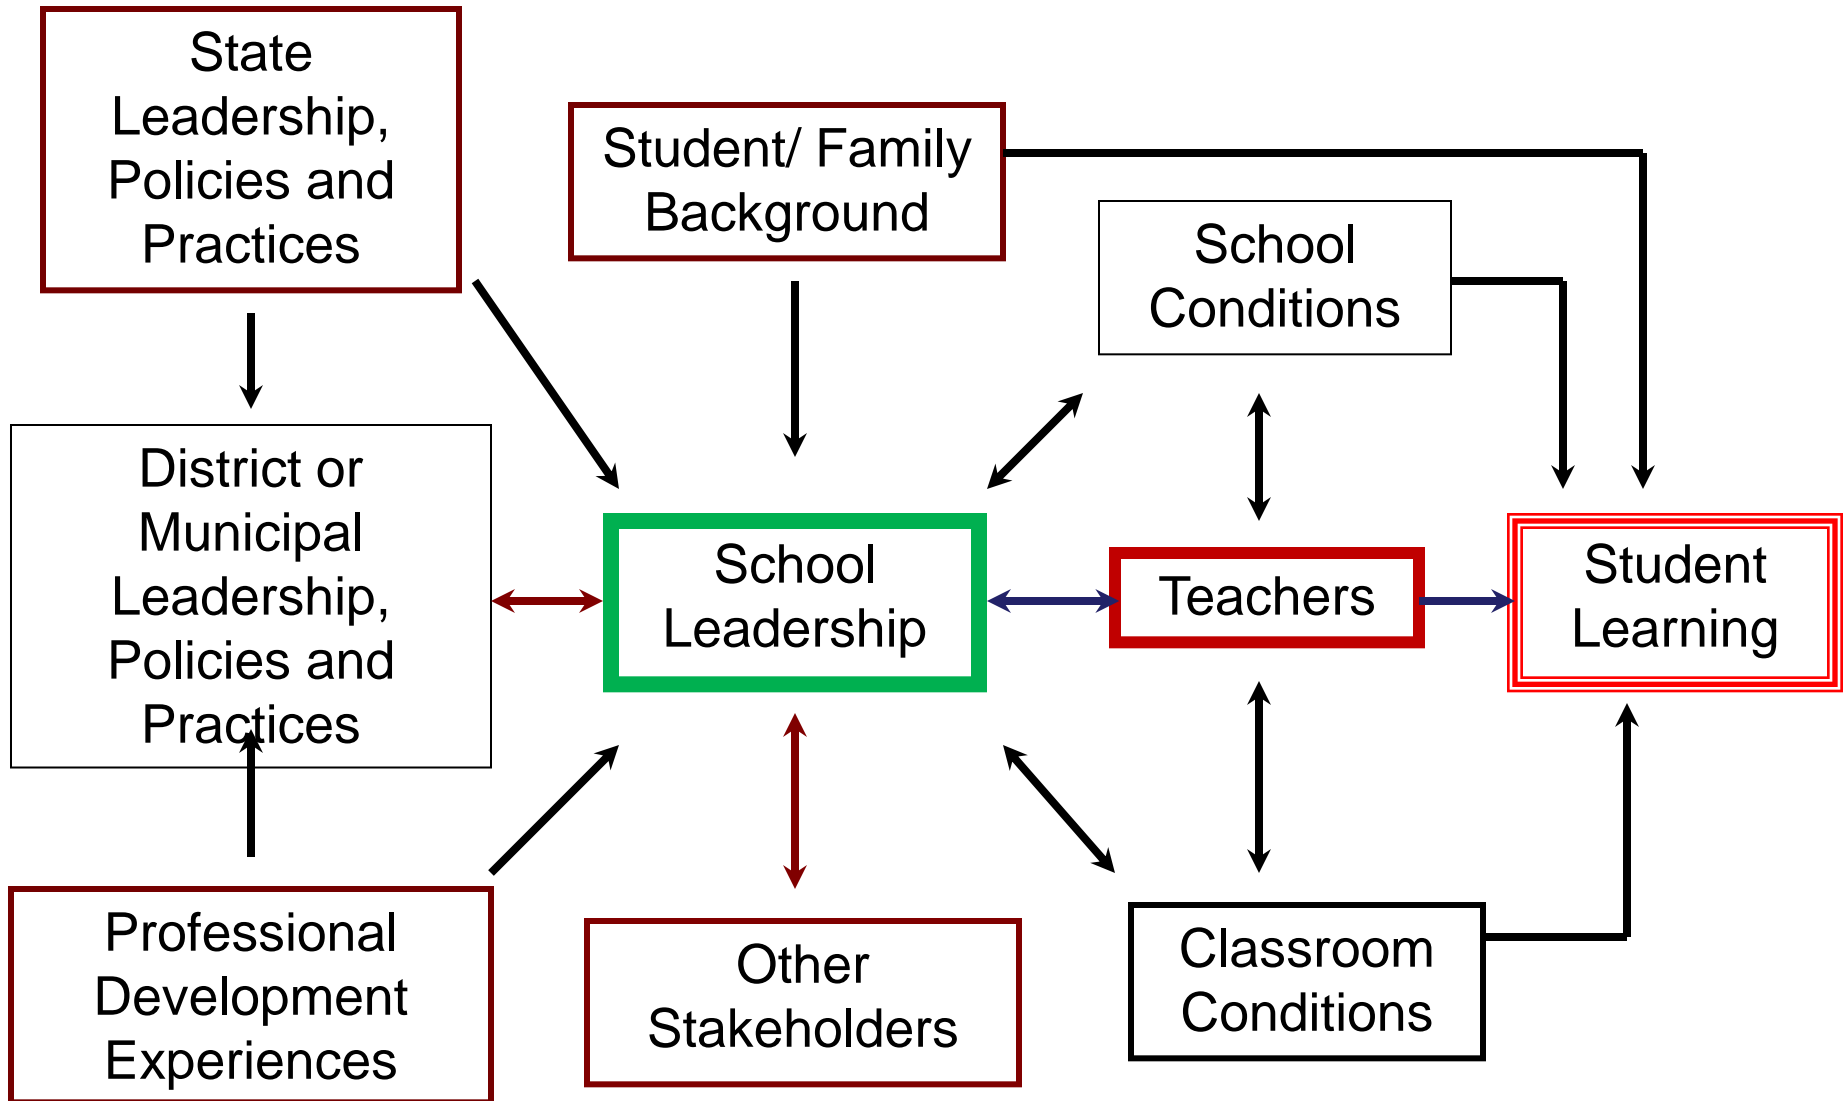

# A WHOLE SCHOOL FOCUS

1. Better instruction for all students in all subjects
2. Involving all teachers
3. Engaging parents and the wider community

Have you met your B School advisor?  
Meet your advisor today!  
[www.freer@tulane.edu/student](http://www.freer@tulane.edu/student)

**WHAT DOES THIS  
MEAN  
IN PRACTICE?  
Where can  
principals start?**

# FOCUS ON LEADERS AND TEACHERS

# Leadership for Professional Community

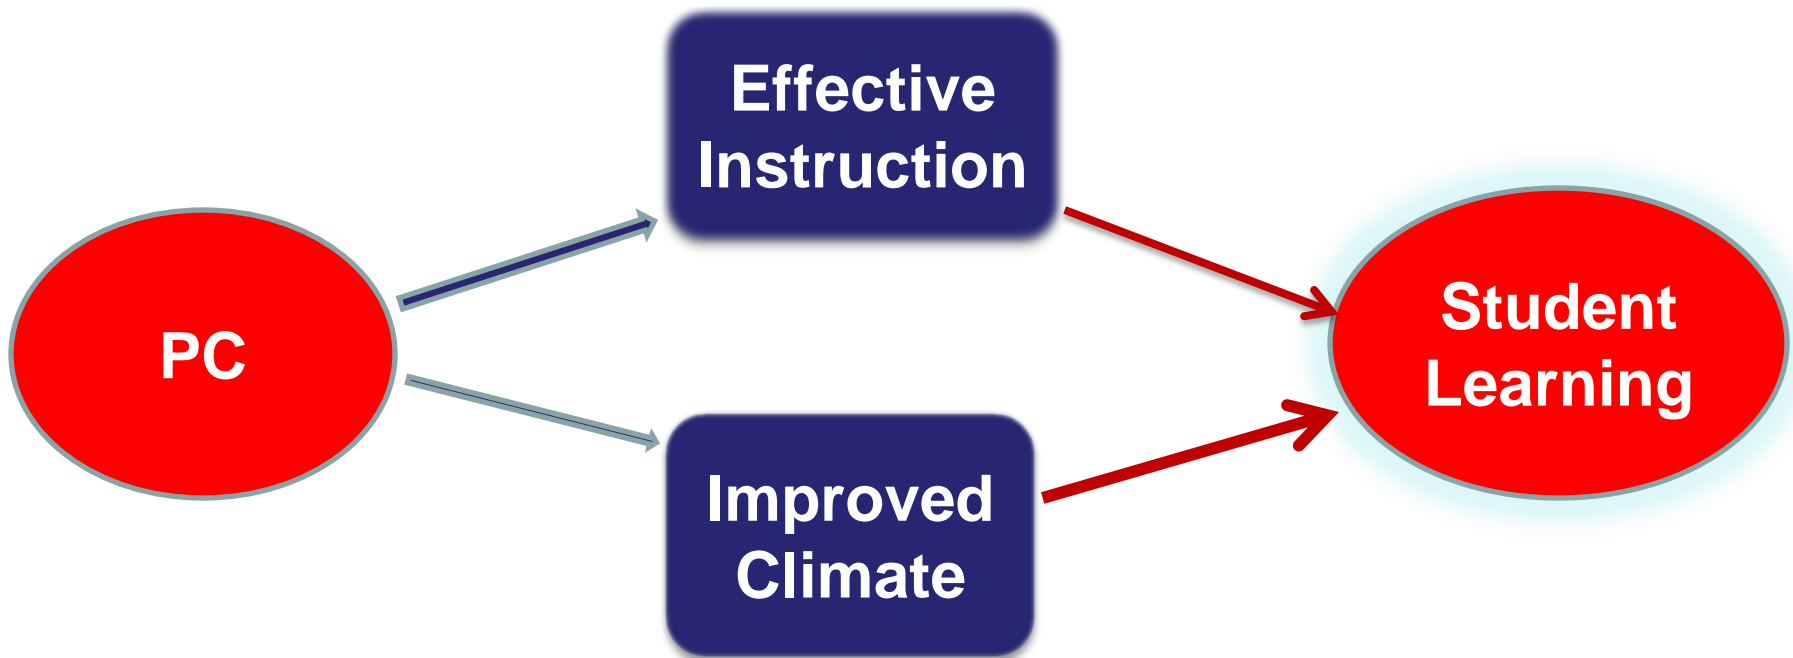

- Leadership is most effective when it strengthens “professional community”—which is teachers working together to improve their practice and improve student learning.

# Elements of Professional Community

1. Shared norms and values
2. Collective focus on student learning
3. Collaboration
4. Reflective dialogue
5. “Deprivatized” practice

# The Power of Professional Community (PC)

# PC (Professional Community) *Is Not (Necessarily) PLCs*

- PLCs = structural vehicle to provide opportunity (teacher teams)
- PC = actual level of teacher collaboration (teacher behavior)
- PC IS THE BASIS FOR EFFECTIVE PROFESSIONAL DEVELOPMENT

# How Does Sweden Fare?

- [EducationGPS\\_Topic\\_report \(3\).pdf](#)

# Buzz

Consider the elements of professional community – which are already present in your school? Which present real challenges?

1. Shared norms and values
2. Collective focus on student learning
3. Collaboration
4. Reflective dialogue
5. “Deprivatized” practice

SHARE ONE CHALLENGE WITH SOMEONE NEAR YOU....

# WHAT DO EFFECTIVE PRINCIPALS PROVIDE?

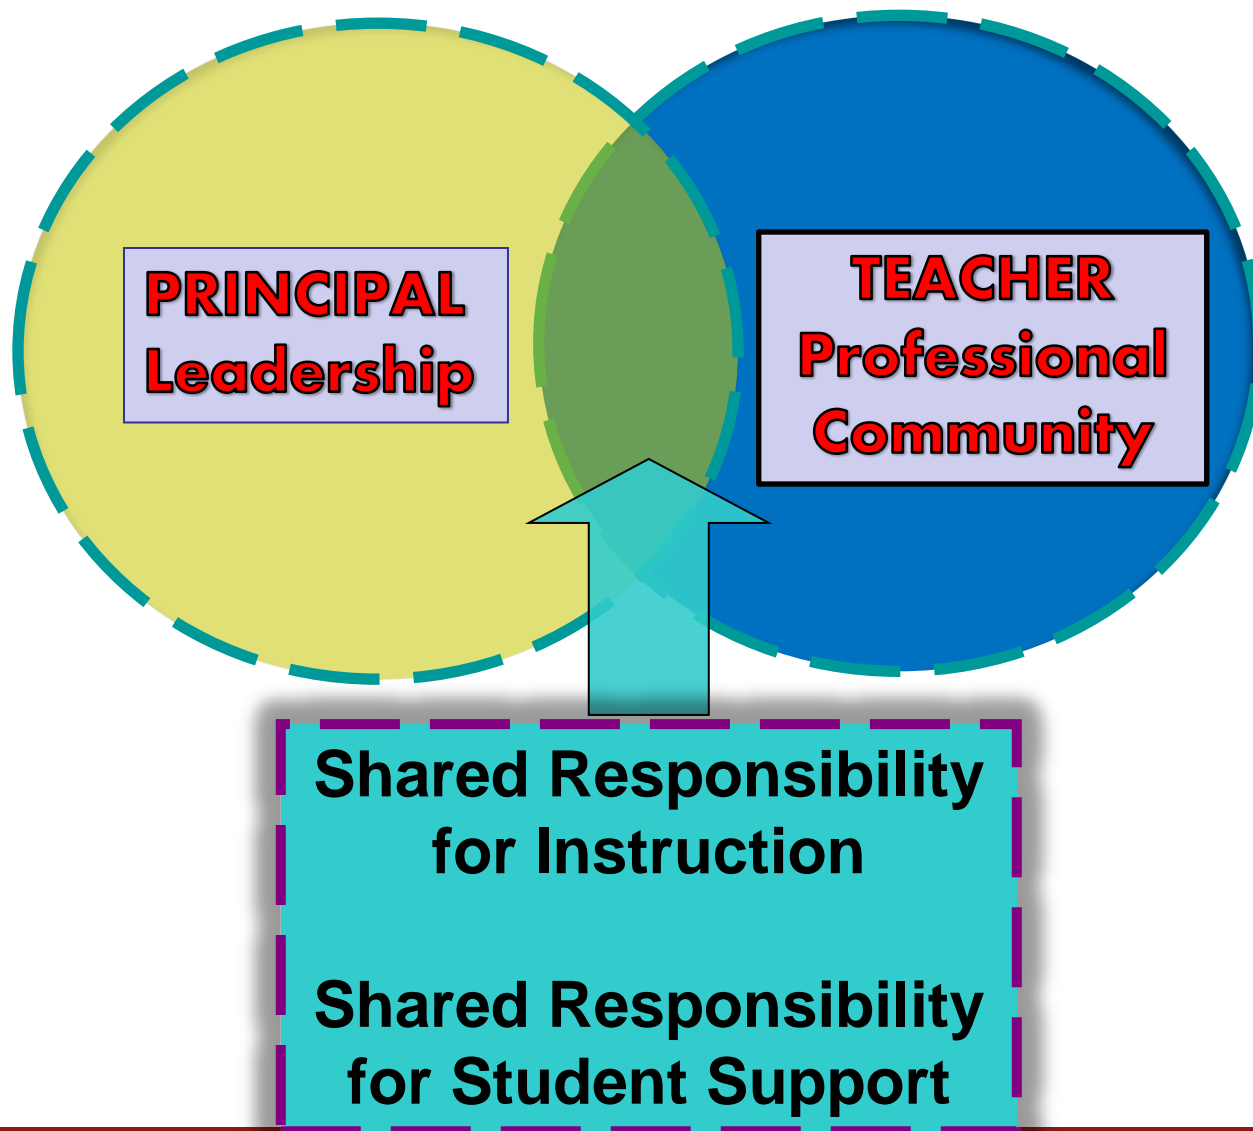

# Leadership for Instructional Improvement

- ....affects working relationships and, indirectly, student achievement. (*Instructional Leadership*)
- ....is shared, fostering stronger teacher working relationships. (*Shared Leadership*)
- ....creates a culture of support for student academic work (*Caring*)

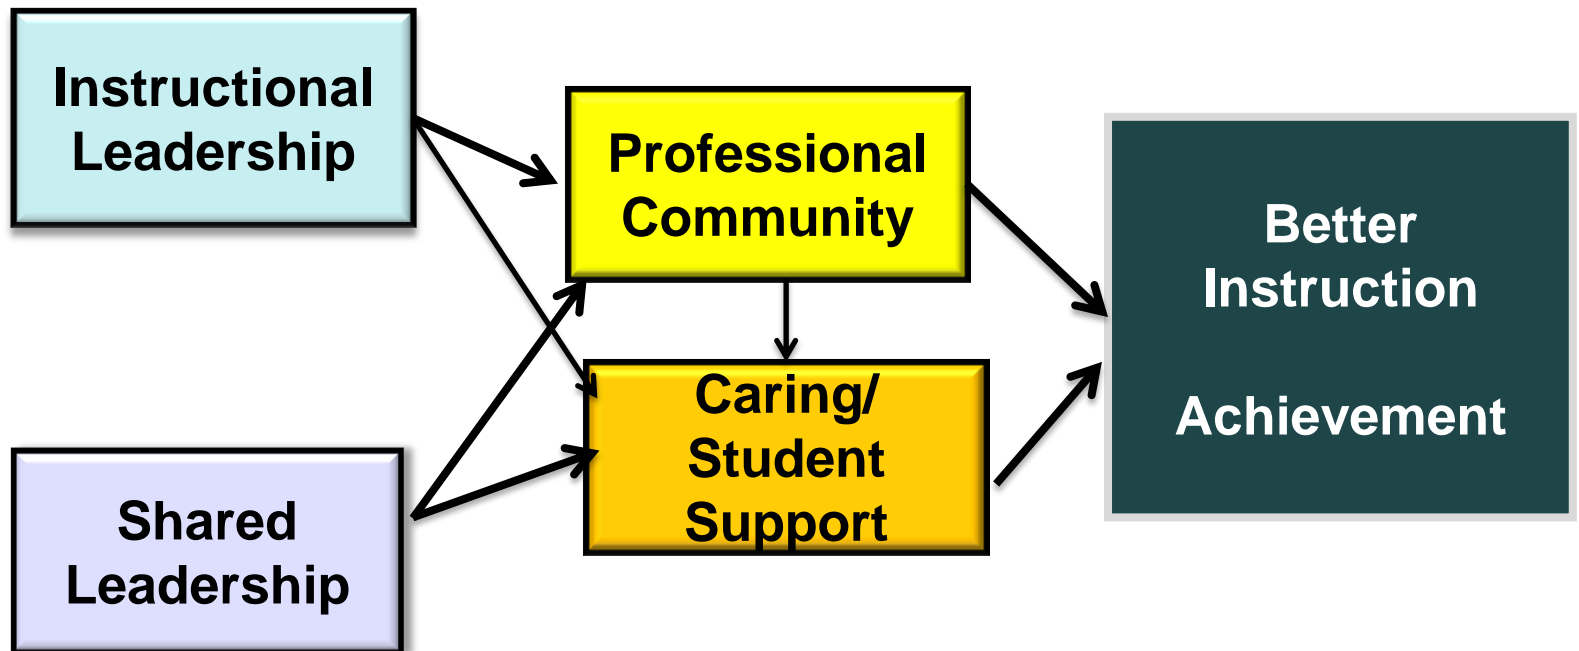

# What This Means....

## According to Teachers, Principals...

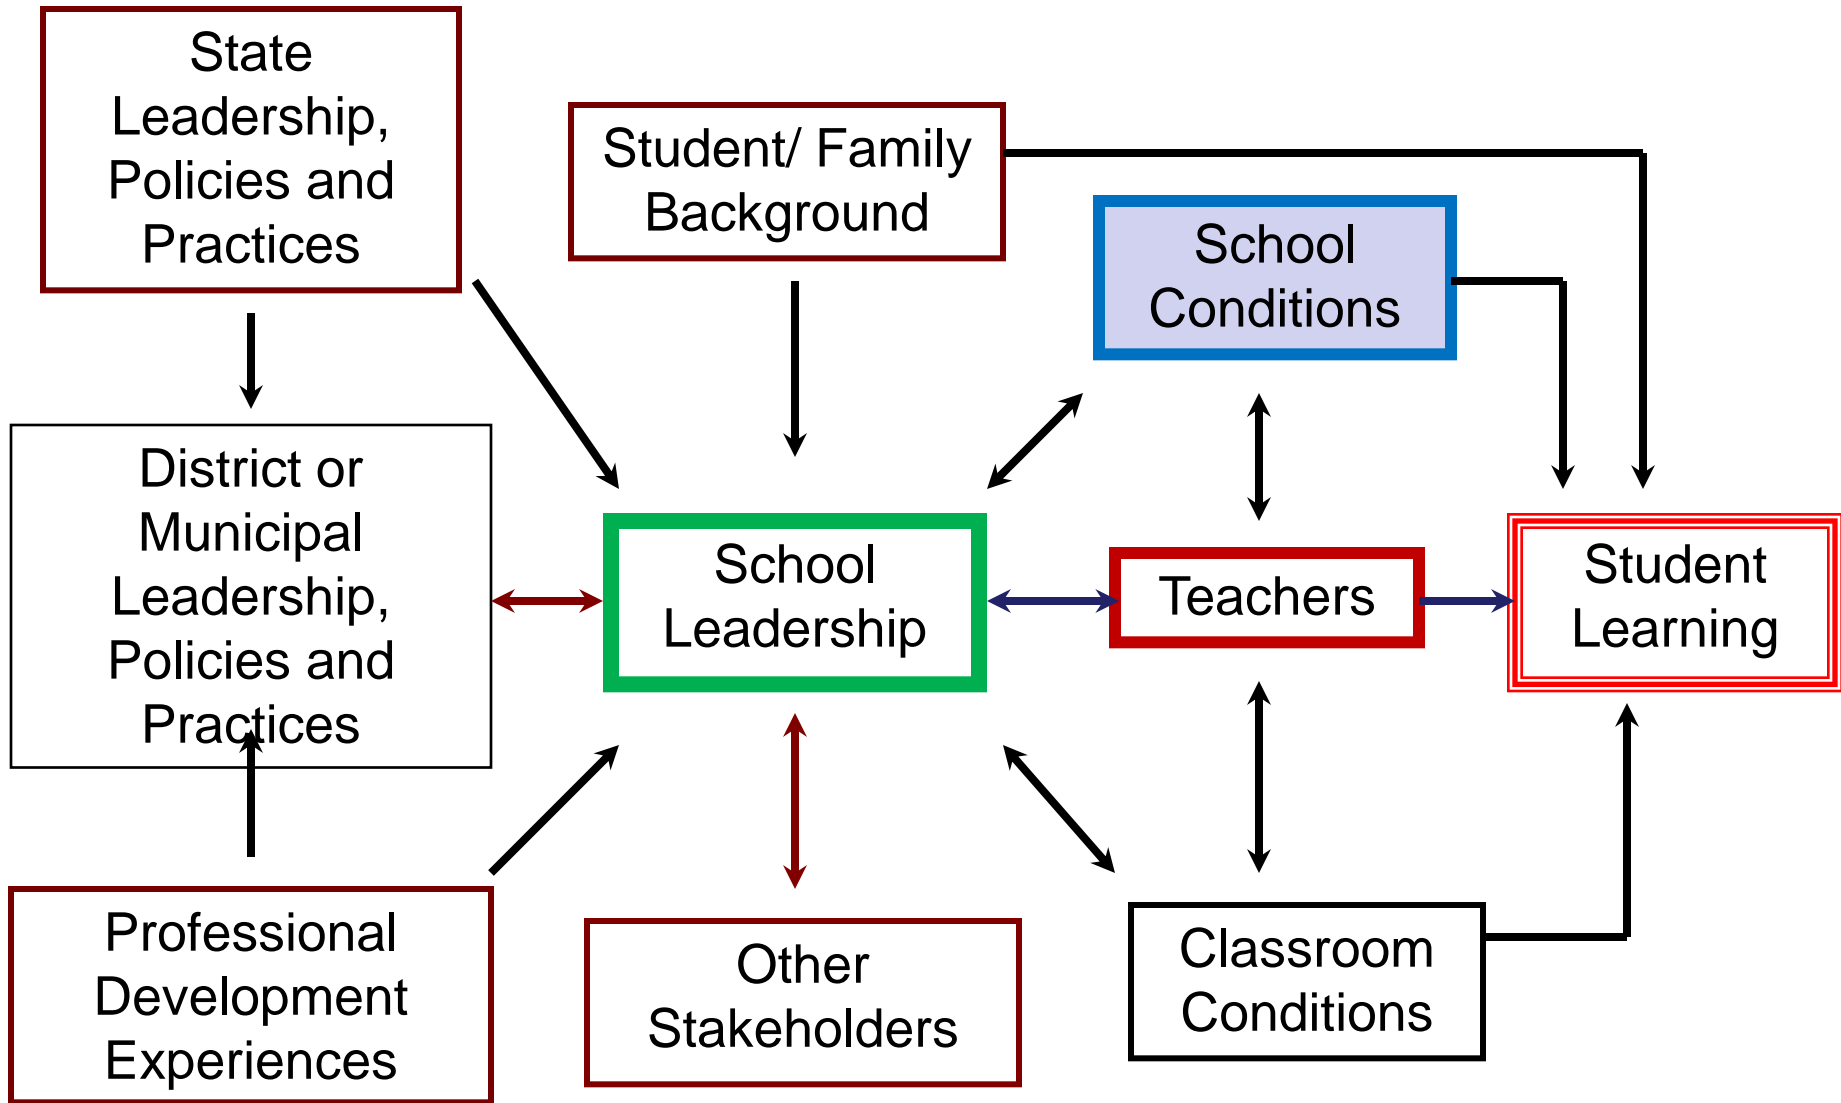

- observe classrooms and ask questions that provoke teachers to think
- give “power” over curriculum priorities and school practices to teachers; teachers are always consulted
- ensure that all students have equal opportunity to have the best teachers
- Use staff meetings to talk about equity and instruction, not about procedures
- Ask all teachers to observe other classrooms

# Leadership for and with Teachers and Student Achievement

# FOCUS ON LEADERS AND SCHOOL CULTURE

# **PRINCIPALS SHAPE CULTURE**

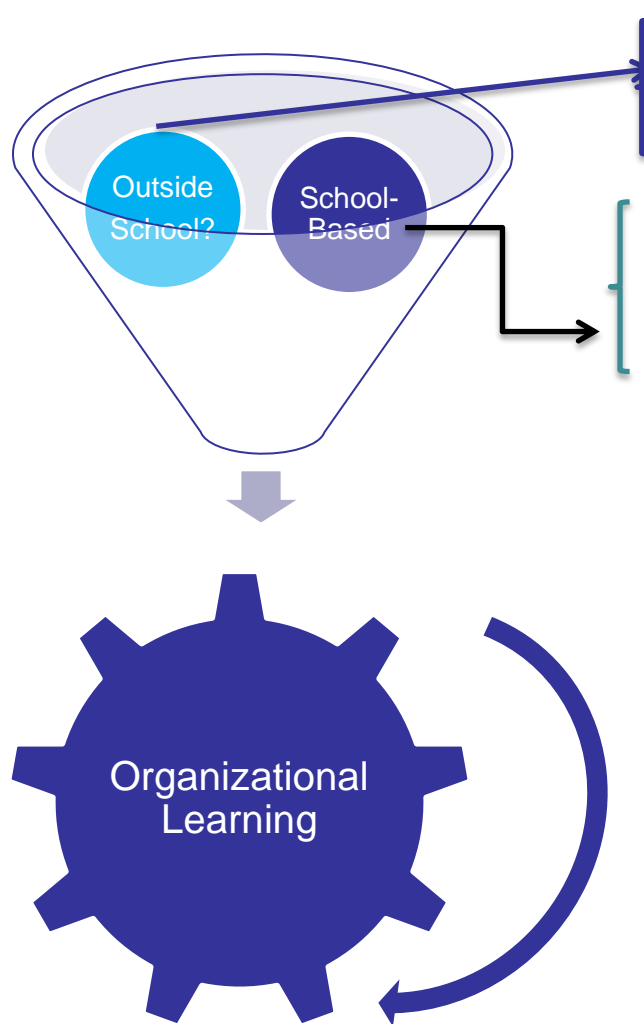

# What Does It Take to Unfreeze Culture?

Credit – Jennifer York-Barr

# ORGANIZATIONAL LEARNING

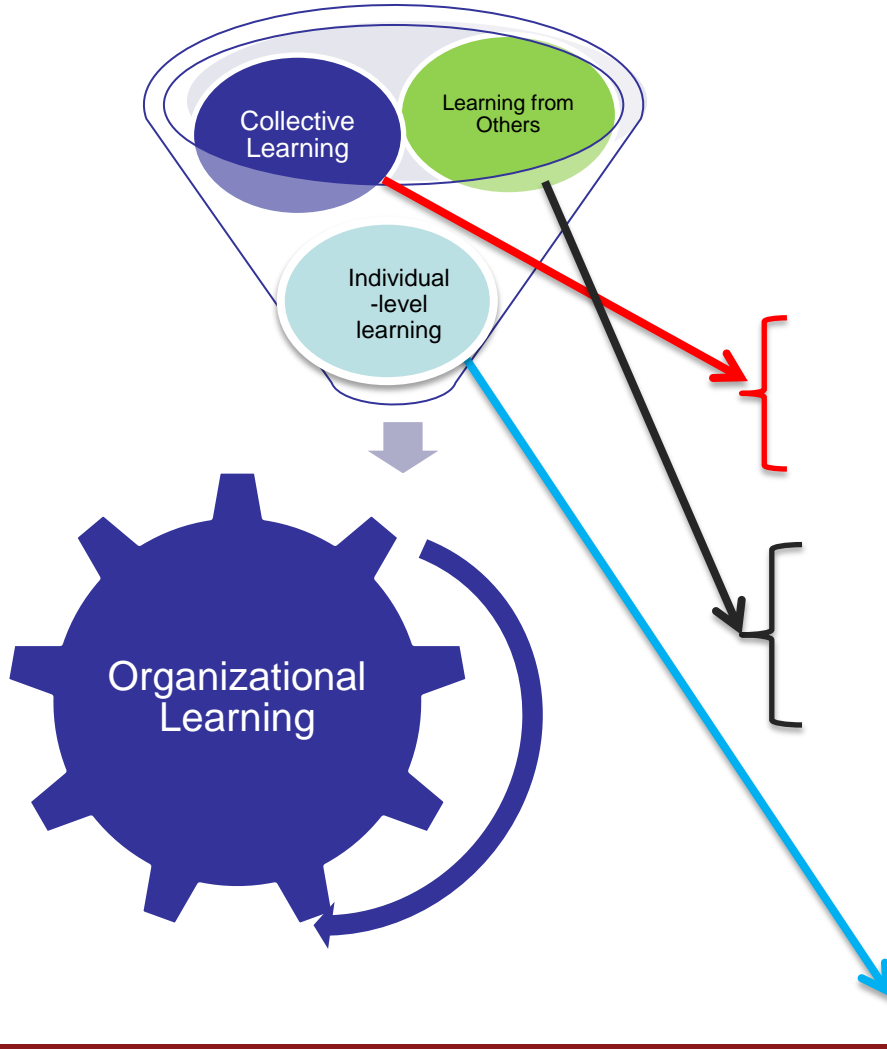

- SEARCHING FOR KNOWLEDGE
- SHARING KNOWLEDGE

- EVALUATING KNOWLEDGE
- USING KNOWLEDGE

- **Andy Hargreaves:** “Strong and sustainable PLCs are also connected to others around them. They learn from the outside as well as the inside”
- **Louis Stoll and Karen Seashore Louis:** “Without due attention to fostering ties outside the school, strong professional communities can, paradoxically, become a barrier to change”

# ORGANIZATIONAL LEARNING OCCURS EVERYWHERE

- How many teachers in this school show initiative to identify and solve problems? (SEARCHING)
- How many teachers in this school seek out and read current findings in educational research? (SEARCHING)
- How many teachers in this school share current findings in education with colleagues? (SHARING)
- After attending professional development activities this past year, did you discuss what you learned with other teachers in your school who did not attend the activity? (EVALUATING)
- After attending professional development activities this past year, did you discuss or share what you learned with administrators? (EVALUATING)
- After attending professional development activities this past year, did you make changes in your teaching practice? (USING)

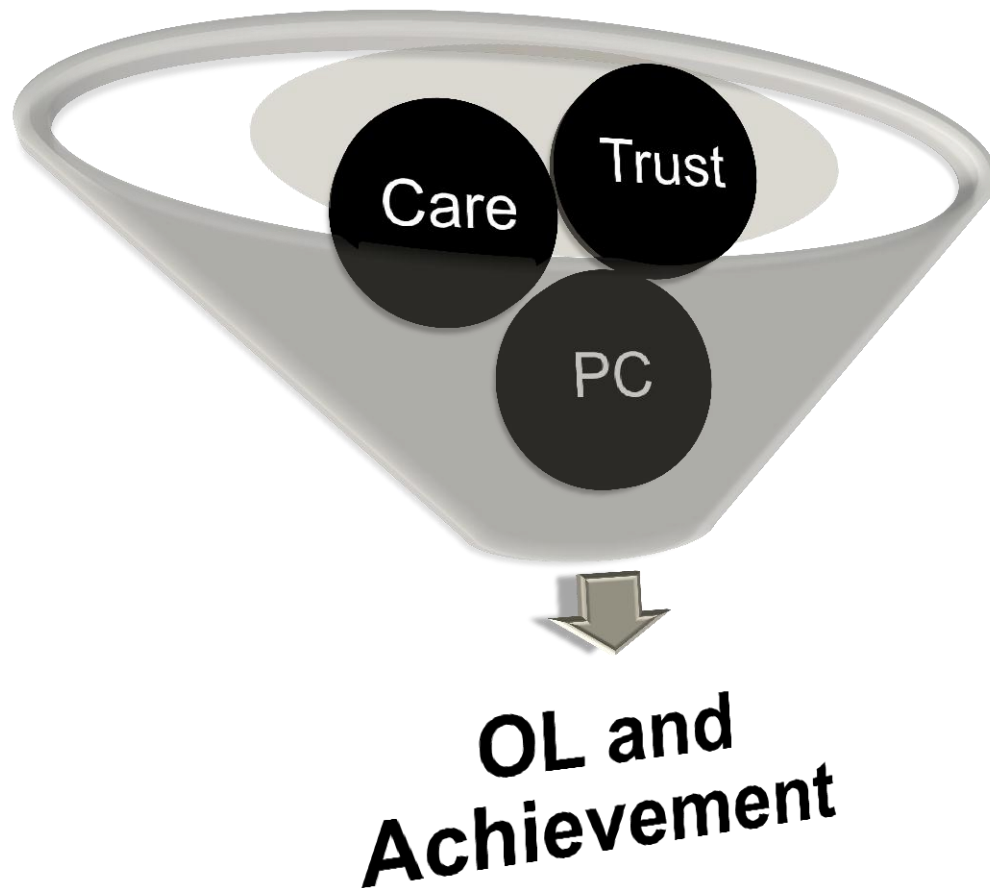

# ORGANIZATIONAL LEARNING OCCURS EVERYWHERE

**WHAT COULD YOU DO TO INCREASE ONE OF THESE PRACTICES?**

- How many teachers in this school show initiative to identify and solve problems? (SEARCHING)
- How many teachers in this school seek out and read current findings in educational research? (SEARCHING)
- How many teachers in this school share current findings in education with colleagues? (SHARING)
- After attending professional development activities this past year, did you discuss what you learned with other teachers in your school who did not attend the activity? (EVALUATING)
- After attending professional development activities this past year, did you discuss or share what you learned with administrators? (EVALUATING)
- After attending professional development activities this past year, did you make changes in your teaching practice? (USING)

# OL AND ACHIEVEMENT DEPEND ON A SOLID ADULT CULTURE

# The Fourth Component of Culture: Expectations and Accountability

1. Standards and clear expectations
2. Appraisals aligned with standards
3. Meaningful feedback loops
4. Minimizing one-shot, high stakes assessments
5. Clear results/fair outcomes

**SIMPLE APPROACHES CAN  
HAVE NEGATIVE EFFECTS**

DEMOGRAPHICS ARE NOT DESTINY...

# LEADERSHIP THAT MATTERS IS HIGHER...

- In high poverty schools
- In medium and smaller districts
- Where leadership turnover is lower

# THE PROBLEM OF TURNOVER

E HERSTAD

BOUDDÉN

Lundberg

# The Problem of Turnover....

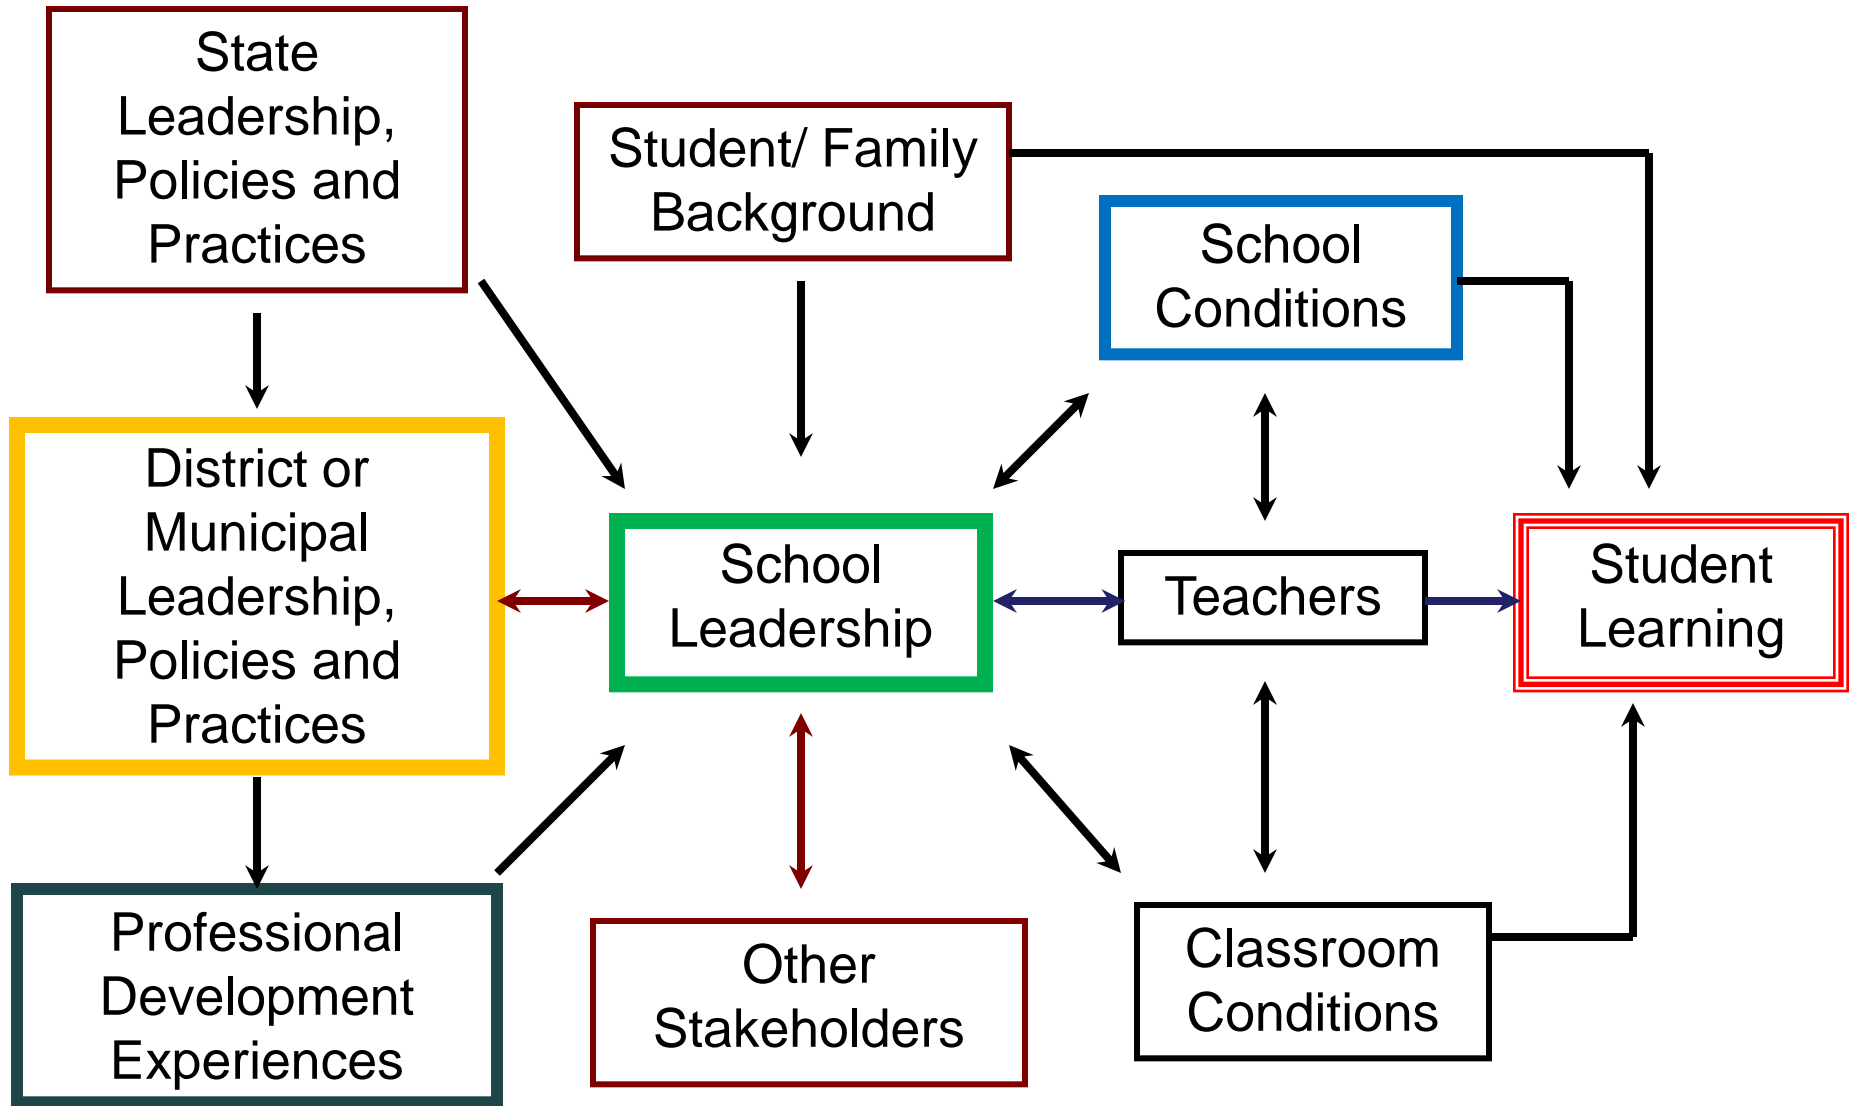

- The typical school in the U.S. has a new principal every 3.2 years. Teachers are “aging out”  
Turnover is negatively related to student achievement  
Districts approached the issue of principal and teacher quality as a “hiring problem”  
Districts did not have strategies for managing turnover
- Schools with higher teacher PC managed turnover better

# At The School Level in Sweden

- Schools hire Teachers
- Schools influence teacher retention
- More experienced teachers are just as engaged in change as younger teachers
- Who is involved? How does hiring affect PC?
- Principals and school culture have a big impact
- Teams that cross disciplines, ages, and gender creates a stronger culture

# FOCUS ON MUNICIPAL/DISTRICT LEADERSHIP ROLES

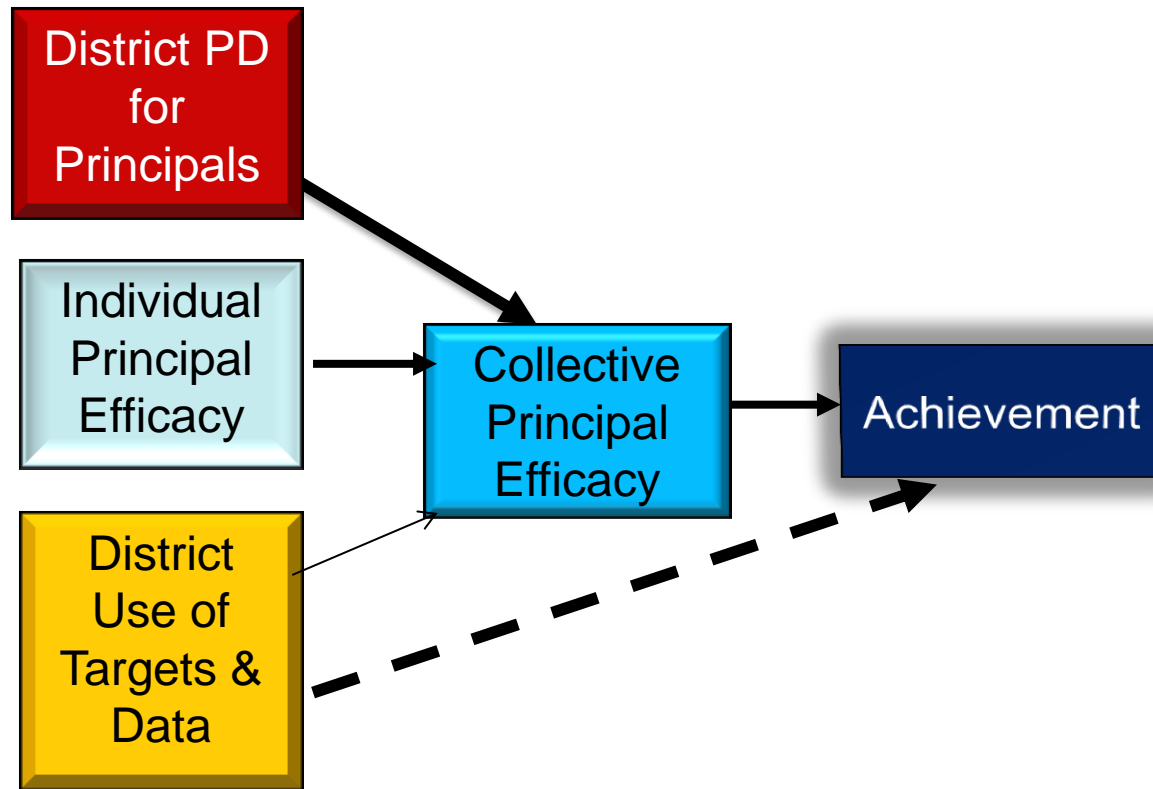

# Districts Affect Achievement

Using data and setting targets has negative effects on instructional leadership and achievement when principal confidence is low.

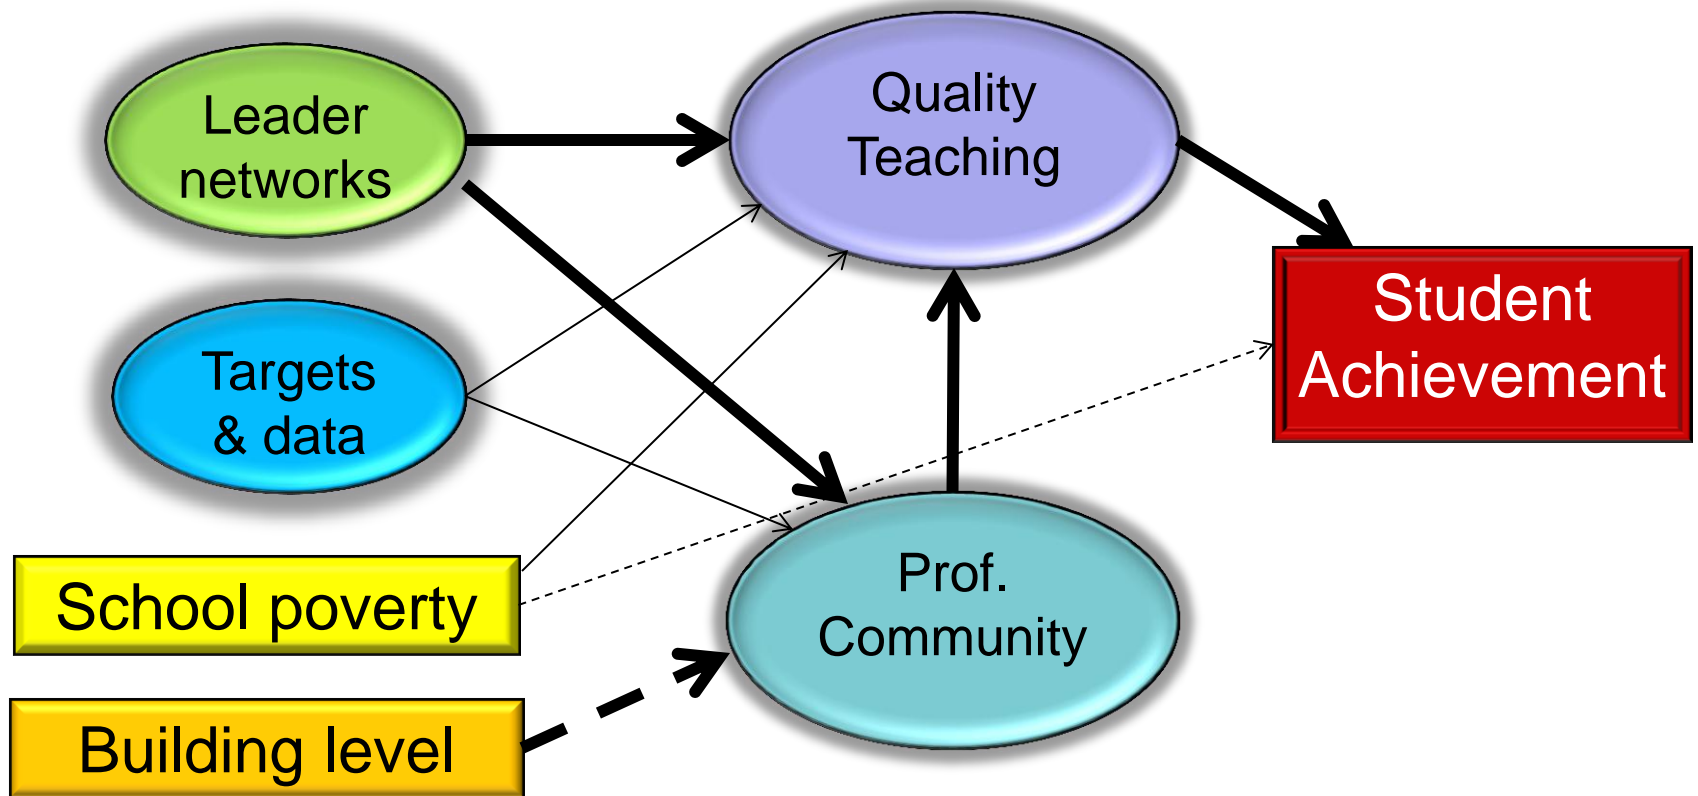

# DISTRICTS CAN SUPPORT PRINCIPALS

Solid lines indicate a positive relationship.  
Dotted lines indicate a negative relationship.

# Professional Community for Principals

# **BUT: Professional Development for Leaders is Often Insufficient**

- Few U.S. districts have a coherent professional development system for principals; most rely on episodic events
- Few principals have regular contact with a (mentor/coach) in the district office.
- Only half of principals agree that the district leaders assist them to be better instructional leaders in their schools.

# Districts, Leadership PD, and Student Learning

Leaders in higher-performing districts...

1. Communicated explicit expectations for principal instructional leadership
2. Provided learning experiences in line with these expectations.
3. Monitored principal follow-through
4. Provided further support where needed, including
  - discussions about school performance and improvement plans
  - informal advising and coaching interventions.
5. Modeled effective data use

# Key PD Practices in Schools and Districts....

1. Promoting cognitive shifts – helping others to see beyond current practices.

# Key PD Practices in Schools and Districts...

2. Naming and shaping a larger identity that supports boundary crossing

# Key PD Practices in Schools and Districts....

3. Engaging in dialogue about differences; creating multiple overlapping shared leadership environments with community

# Key PD Practices in Schools and Districts....

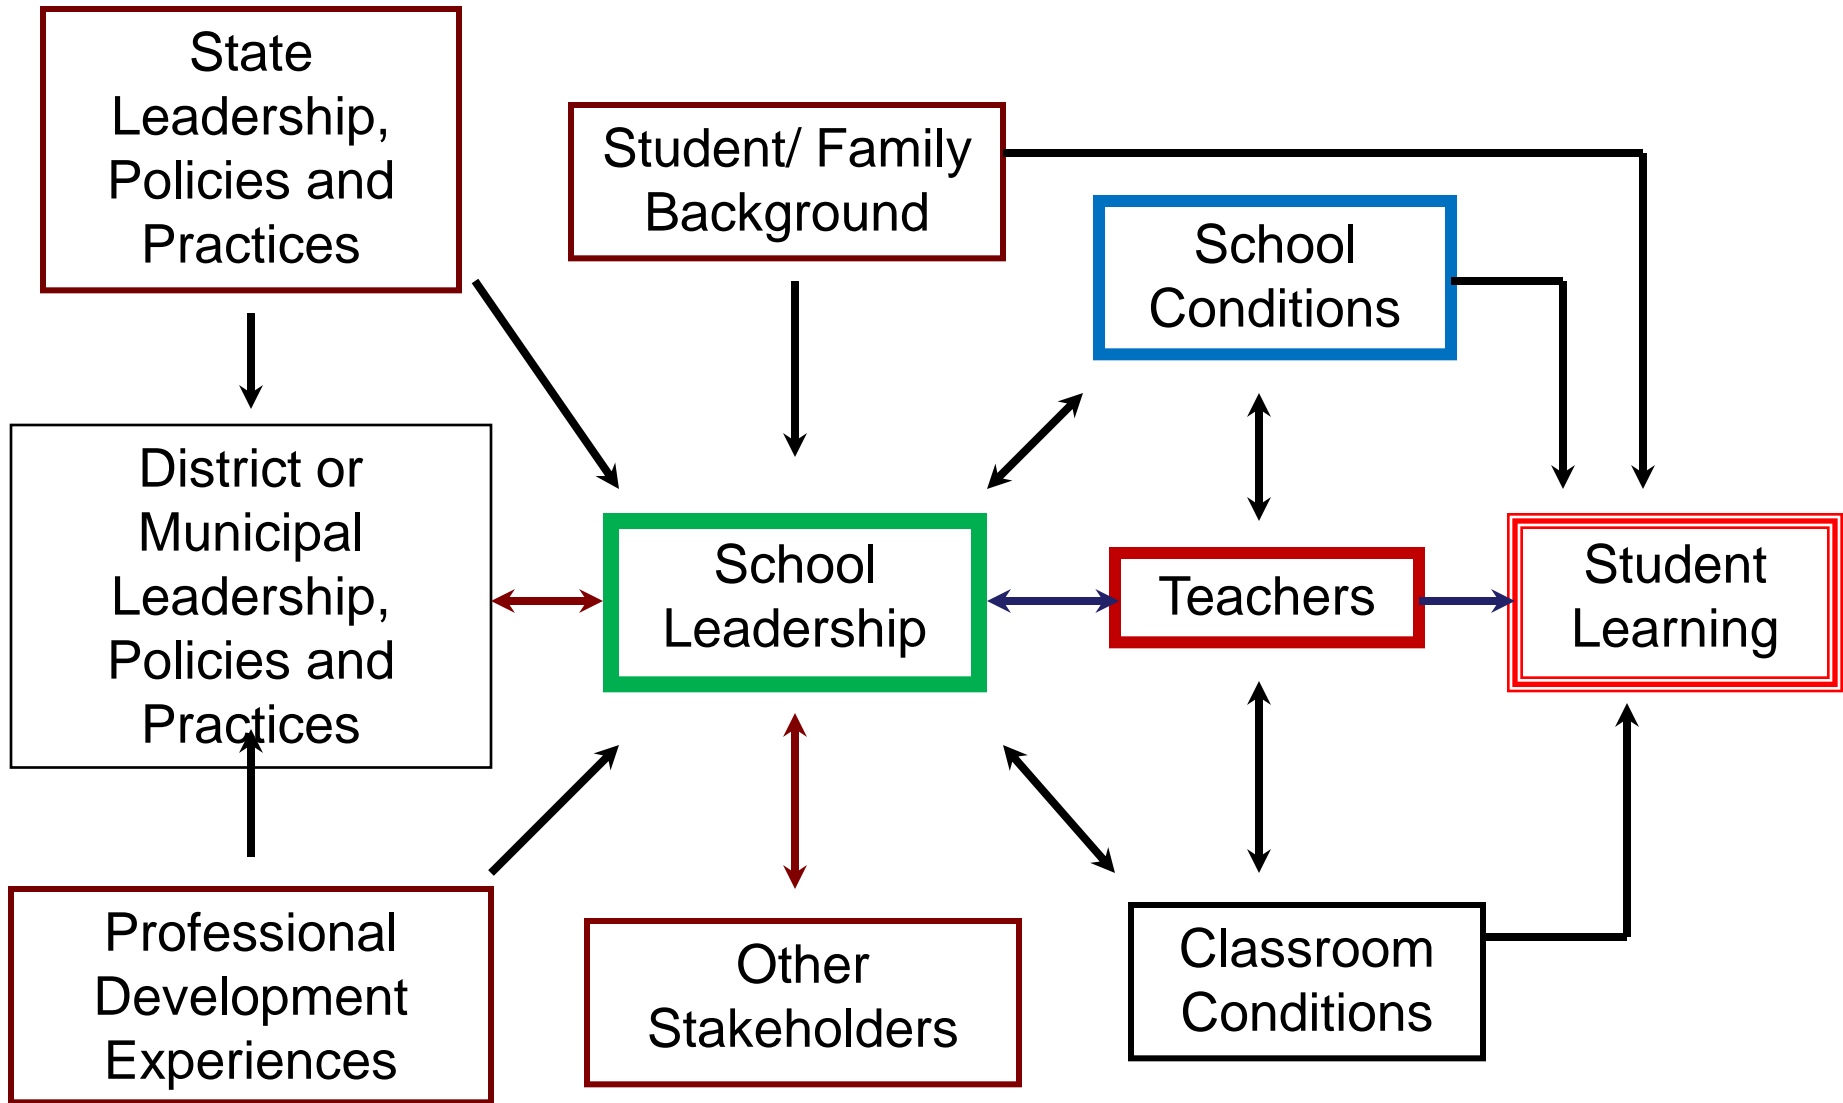

4. Creating equitable governance mechanisms – using policy to promote inclusion around important questions and tasks.

# Key PD Practices in Schools and Districts....

5. Cementing boundary-crossing through interpersonal relationships

# Source of Ideas about Integrative Leadership in Education

Parents and Community

Principals

District Office

Teachers

# Community Engagement Starts with the District

District policies that promoted engagement increased participation from diverse stakeholders.

***Where it is not a superintendent priority, principals generally avoid it.***

***IN SUM: Schools are still bureaucracies but effective boundary-crossing cultures help to ensure effectiveness.***

**WHO ADVOCATES FOR  
PARENT AND COMMUNITY  
ENGAGEMENT IN YOUR  
KOMMUN?**

**WHAT COULD OR SHOULD  
YOU DO?**

Handwritten purple wavy lines on a yellow background.

Handwritten red wavy lines on a yellow background.

Handwritten green wavy lines on a yellow background.

**HOW?**

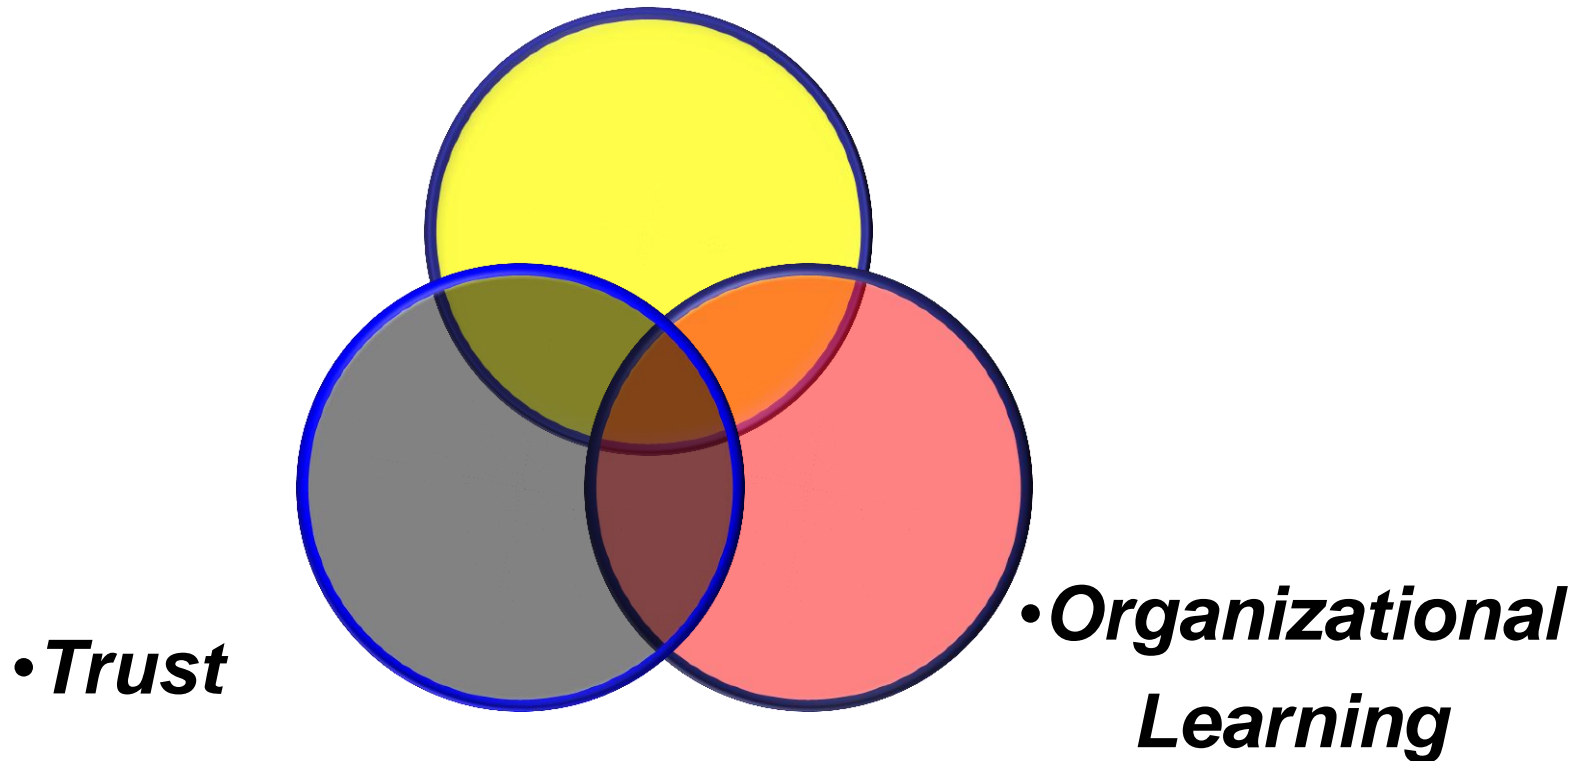

# How We Work With Students

# HOW ADULTS WORK TOGETHER

• *Professional Community*

# How We Create an OL Culture

## Cooperative Culture

- Strong, mutually reinforcing exchanges and linkages between teachers and departments
- Policies, procedures, standards, and tasks are designed to encourage teamwork and camaraderie
- Teachers think of themselves as “owners” rather than employees.

## Adaptive Culture

- The school actively monitors the environment
- Policies and practices support the school’s ability to respond to opportunities or avoid threats
- Members take risks and experiment
- Teachers and Leaders actively engage the community.

# Let's Not Fool Ourselves...

**“I thought I felt a paradigm shift, but it was just my undershorts riding up.”**

# Or Hope for Quick Fixes

# Or Expect Stability..

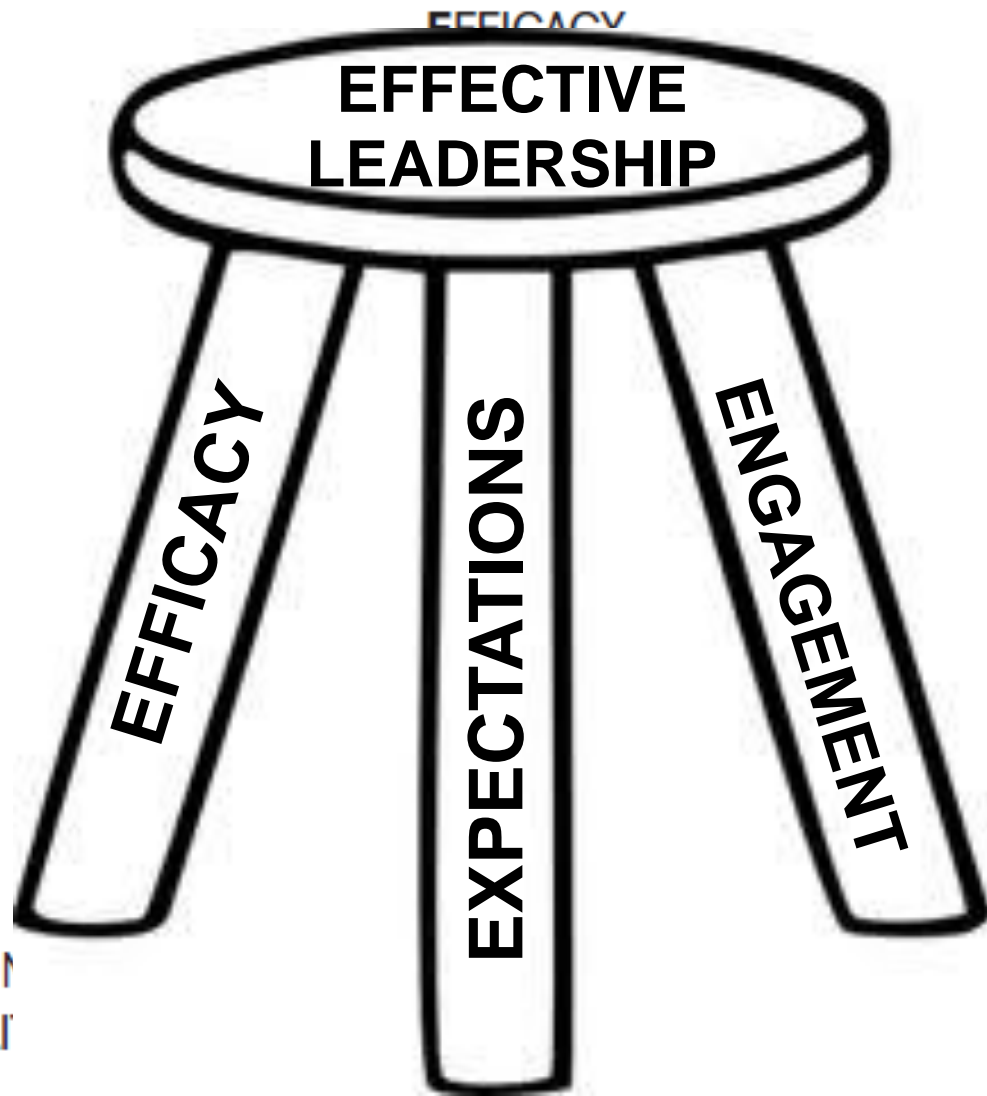

# A Reminder....

- School Improvement is more likely to require “steady work” than silver bullets;
- Culture is hard to change;
- Professional and school development programs need to keep an eye on the long-term social benefits – but remain adaptive.

A vertical wooden spiral, possibly a piece of driftwood or a decorative element, is positioned on the right side of the image. It is set against a solid, muted brown background. The spiral is composed of several curved, overlapping segments of wood, creating a helical shape that runs from the top to the bottom of the frame. The wood has a natural, slightly weathered texture and a warm, brownish-orange hue.

**NOT SIMPLE, NOT EASY**

BUT A POWERFUL TOOL FOR PRINCIPAL LEADERSHIP

EXPECTATION  
AND ACCOUNTABILITY

ENGAGEMENT  
OF STAKEHOLDERS
