UMU EXPERTS IN THE CORONA SPOTLIGHT

Forskare argumenterar för byte av strategi mot coronaviruset

wwer Forskare vid bland annat Umeä universitet skriver i Läkartidningen att Fosihälssomyndigheten bör ta upgötraget att minska smittspräningen och därmed förhindra nya fall av connaviruset på större allivar. Pler förseningar och channningar kan få ödesdigna effekter pi fosihälaan i Swerige, skriver forskarna i en debattartikel.

Seek Cita Nilson

 Det ar dags att Fotkstatsomyndighenen omprover ein neuvarande passeva strategi på samma sitt som de flitt ta tillbaka tidigase uttalanden om att viruset inte skulle spridas utantile Kina, säger Juscim Rocklöv, professor i eyidemiologi vid Umeli universitet.

Henrik Sjódin við Unst universitet tilbammann með forskarhöliggar í Uppuda, Stockholm och Gittoberg att läget með corunariruset na látnar en pandemi. Corunariruset visar stilma investfetharfa til salsongskildunnan, och även dödligheten fisefaller bli betydligt higre, sårskilt bland ildde.

Und international results entering in the international following international policy in larger bases can del handlier on enestata fail ord, on internati berellirbabetei it lig, skeiver forokoma. I Storferitannien har man hitillis upptiekt in gibt ikka milaga fall som i Sverige. Men die Recikler myndigheterna bevonus austrapteikningen ierse genom att fichkland astera folksamlingur, oppensaar till mindate srande och stänger ned disslor och vårelinrittningar om personal mindate handlier.

 - Neetige bot ta etter Mutteritannen och andra tinder som agerar resont tor att i ett sit tillgt skede som mijligt på alla tillgängliga sätt aktivt bromsa språdningen av coronaniruset. Ju längre man väntar, desto sedrare blir det, säger Joneim Rockläv.

Till debuttartikel i Likartidningen 🗗

Professor: Sitter man och väntar har man förlorat

Sverige har undervärderat riskerna - borde övervärderat

PUBLICERAD: I GÁR (D. 11 UPPEATERAD: I GÁR (D. 1

NYMETER

Undvik kollektivtrafik, håll avstånd, undvik stora evenemang, jobba

Det är råd som svenska folket redan borde ha fått av myndigheterna menar epidemiologen Joacim Rocklöv.

Om man gör det tidigt får man större effekt än om man gör det senare. Sitter man och väntar på tydligare signaler om smittspridning har man förlorat en del, säger han.

SHOULD YOU COMMUNICATE? YES? WHEN?

- As an expert to comment on current events
- Study to be published in scientific journal
- Project receives grants
- Thesis finished
- Project finished final report

WHERE TO TURN? ORGANISATION

• Umeå University has no Head of Press, but press@umu.se

You have two options:

Talk to your Department Communications Officer

Talk to your Faculty Communications Officer

PITCH YOUR IDEA

- 1. Be in good time.
- 2. PHONE or EMAIL. Briefly explain "the thing" so that your communicator can quickly assess the news value, scope and suitable channel.
- 3. Give additional information, i.e. report, scientific article, its relevance in society, cooperations, etc
- 4. Gather photos that complement the news. For example, portraits, from an event, the field, the lab, etc.

TO GET A PRESS RELEASE DONE

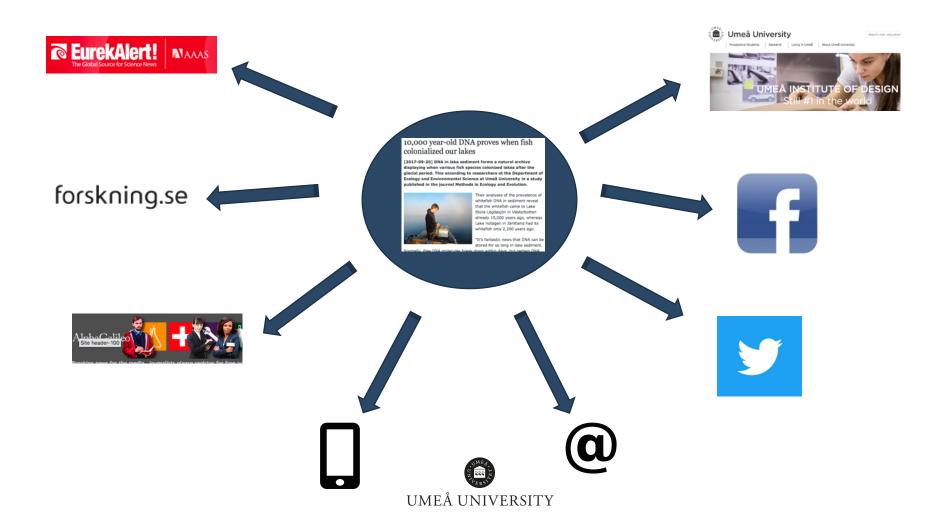

- Once again: Contact us as early as possible!
- Write a rough draft yourself
- We edit and finalize the press release

Tips on how to write:

https://www.aurora.umu.se/en/service-andsupport/communication/contact-with-the-press/writing-a-pressrelease/

New possibilities for lightemitting plastics with patterned light

Mattias Lindh shows that the thickness of ultra-thin light-emitting plastics is important for brightness.

Press Release from Umeå University

Physiological differences in women's ice hockey in Sweden and North America

[2018-01-09] Female ice hockey players from North America have better financial conditions as well as greater leg strength and running acceleration than female ice hockey players from Sweden, who in return have less body fat. This according to Tommy Henriksson in his doctoral dissertation at Umeå University.

"The noticeable physiological profiles that separate Swedish from North American female ice hockey players are probably reflected in the differences in their training approach. That in effect may derive from various socio-cultural and financial conditions," says Tommy Henriksson.

For his doctoral dissertation, Tommy

Umeå researcher on the top list of future biochemists

name Professor Yaowen Wu, has been appointed as future top biochemistry researcher in Americian Chemical Society's prestigious journal Biochemistry. A total of 34 selected researchers in their early career in biochemistry from all around the world were presented in this year's first issue.

Breakthrough enables ultra fast transport of electrical charges in polymers showed, for the first time, that a very efficient vertical charge chain and ensemiconducting polymers is possible by controlled enables transport in polymers by more than the solution of the polymers in possible by controlled enables transport in polymers by more than 1,000 times, recently published in the journal Advanced Materials.

Conjugated semiconducting polymers (plastic) possess exceptional optical and electronic attractive in the production of as for instance photovoltaic solar (OLED) and lasers.

THE PHONE RINGS – MEET THE JOURNALIST

- You don't have to answer the journalists questions at once.
 Book a meeting, prepare and think through your main messages
 (max 3)
- Practice to explaine your results orally in an easy-tounderstand way
- Before publication, ask to read what the journalist has written. At least your quotations.
- Have a high resolution portrait photo in hand. The journalist often ask about one.

Tip! Book portrait photo session at Inhouse!

Forskning

Omnämnanden

Min forskargrupp har som huvudsakligt mål att utveckla kemiska substanser som selektivt binder och stabiliserar G-quadruplex-DNA-strukturer. Detta kan göras på olika sätt, vi använder framför allt strukturbaserad design och olika screeningstrategier för att identifiera lovande molekyler som vi sedan syntetiserar och vidareutvecklar. Projekten är överlag tvärvetenskapliga och drivs ofta i samarbete med andra forskargrupper.

Strukturen av DNA i form av en dubbelhelix har länge varit känd men det har
